

Petition RE Proposed FWP Mattson FAB

We, the undersigned property owners, adjacent to and/or near the proposed Mattson FAB petition the State of Montana and the FWP to reject any proposal to purchase the Mattson property for development into a recreational property/Fishing Access Point.

The Good Neighbor Policy of public land use for recreational lands in MCA 23-1-126, provides that the Department of Fish, Wildlife and Parks should seek a goal of **NO IMPACT** upon adjoining private lands by preventing impact on those lands from ... trespass, litter, noise ... pollution, streambank erosion, and loss of privacy and to prioritize maintenance over new development. The proposed Mattson FAB flies in the very face of The Good Neighbor Policy and negatively and materially impacts our community resulting in both a significant deterioration of the quality of our life and in the devaluation of our property. No amount of good intentions or quality outreach will mitigate the adverse impacts that will flow from the development of an FAB in our neighborhood. It would be unfair to lay the burden of such a project on us and we demand that this project be cancelled immediately.
