Subject: [EXTERNAL] Montana's wolves

Hello,

This email is to support an American petition to stop hunters massacring Montana's Grey Wolf population. If a society is supposed to be civilised then it needs to act in a civilised manner to all and not the few, as this is either racist, classist or speciesist.

Please reconsider any decision to hunt these beautiful creatures. You're so lucky to have the wonderful natural countryside you have in the ' States, please look after and respect it.

Your#,

Paul Perrin.. London, UK.

Subject: [EXTERNAL] 2021 Wolf Season—Proposed Rules
Date: Monday, August 2, 2021 9:41:19 AM

Montana Fish & Wildlife Commission,

I am writing to comment on the proposed rules for managing wolves under recently-passed legislation.

The 2021 Legislature went too far, passing extreme anti-wolf measures that are out of step with what most Montanans want. Wolf mortality is already at an all-time high—400 wolves died in 2019 (300 by hunting & trapping). Expanding seasons and adding new wolf killing measures is unnecessary and unwise.

Please keep snares off of the public lands where many Montanans like to recreate. They create a hazard for people, pets and wildlife. And since snares are cheap, trappers may place thousands out on the landscape, neglecting to pick them up after the trapping season closes.

Please retain the limited quotas for wolves adjacent to our National Parks—millions of tourists spend money in Montana's gateway communities around the National Parks, hoping to catch a glimpse of a wolf, bear and other wildlife.

Please also continue to prohibit the use of bait and hunting at night.

The recovery of wolves in Montana is one of the great American wildlife conservation achievements, about which Montanans are proud to have played a key role. Let's keep it that way with a conservative and cautious approach to wolf management.

Thank you for the opportunity to provide comment.

Montana Fish and Wildlife Commission

Dear Wildlife Commission,

I'm writing to express my opposition to sweeping new laws that create the potential to expand the slaughter of wolves in Montana through cruel and barbaric hunting practices and to urge the Commission to exercise its authority to protect wolves.

While some may call these new laws wolf "management," the intent is obvious: the decimation of wolf populations across Montana.

I urge the Commission to use its discretion to protect as many wolves as possible in implementing new laws. This includes:

- 1) Forgoing the expansion of the wolf hunting and trapping season;
- 2) Banning the use of snares on public lands;
- 3) Prohibiting the use of baits for hunting and trapping and prohibiting night hunting across the state; and
- 4) Limiting the hunting of wolves to one wolf per license, with the lowest bag limit allowed per law applied across the state.

Wolves are an important native wildlife species in Montana and wolves are an important part of healthy ecosystems. Wildlife lovers from around the world come to Montana for the chance to see wolves, providing an important economic benefit to the state.

I urge the Commission to use its discretion to protect as many wolves as possible in implementing these cruel and barbaric new laws.

Sincerely,

Elizabeth Vande Streek

Dear Wildlife Commission,

As a citizen and an Ecologist, I'm writing to express my opposition to sweeping new laws that create the potential to expand the slaughter of wolves in Montana through cruel and barbaric hunting practices and to urge the Commission to exercise its authority to protect wolves.

While some may call these new laws wolf "management," the intent is obvious: the decimation of wolf populations across Montana.

I urge the Commission to use its discretion to protect as many wolves as possible in implementing new laws. This includes:

- 1) Forgoing the expansion of the wolf hunting and trapping season;
- 2) Banning the use of snares on public lands;
- 3) Prohibiting the use of baits for hunting and trapping and prohibiting night hunting across the state; and
- 4) Limiting the hunting of wolves to one wolf per license, with the lowest bag limit allowed per law applied across the state.

Wolves are an important native wildlife species in Montana and wolves are an important part of healthy ecosystems. Wildlife lovers from around the world come to Montana for the chance to see wolves, providing an important economic benefit to the state.

I urge the Commission to use its discretion to protect as many wolves as possible in implementing these cruel and barbaric new laws.

Sincerely,

Jo Anna Hebberger

Montana Fish and Wildlife Commission

Dear Wildlife Commission,

I'm writing to express my opposition to sweeping new laws that create the potential to expand the slaughter of wolves in Montana through cruel and barbaric hunting practices and to urge the Commission to exercise its authority to protect wolves.

While some may call these new laws wolf "management," the intent is obvious: the decimation of wolf populations across Montana.

I urge the Commission to use its discretion to protect as many wolves as possible in implementing new laws. This includes:

- 1) Forgoing the expansion of the wolf hunting and trapping season;
- 2) Banning the use of snares on public lands;
- 3) Prohibiting the use of baits for hunting and trapping and prohibiting night hunting across the state; and
- 4) Limiting the hunting of wolves to one wolf per license, with the lowest bag limit allowed per law applied across the state.

Wolves are an important native wildlife species in Montana and wolves are an important part of healthy ecosystems. Wildlife lovers from around the world come to Montana for the chance to see wolves, providing an important economic benefit to the state.

I urge the Commission to use its discretion to protect as many wolves as possible in implementing these cruel and barbaric new laws.

Montana Fish and Wildlife Commission

Dear Wildlife Commission,

As someone who has visited and spent money in Montana to enjoy the nature and wildlife there, I'm writing to express my opposition to sweeping new laws that create the potential to expand the slaughter of wolves in Montana through cruel and barbaric hunting practices and to urge the Commission to exercise its authority to protect wolves.

While some may call these new laws wolf "management," the intent is obvious: the decimation of wolf populations across Montana.

I urge the Commission to use its discretion to protect as many wolves as possible in implementing new laws. This includes:

- 1) Forgoing the expansion of the wolf hunting and trapping season;
- 2) Banning the use of snares on public lands;
- 3) Prohibiting the use of baits for hunting and trapping and prohibiting night hunting across the state; and
- 4) Limiting the hunting of wolves to one wolf per license, with the lowest bag limit allowed per law applied across the state.

Wolves are an important native wildlife species in Montana and wolves are an important part of healthy ecosystems. Wildlife lovers from around the world come to Montana for the chance to see wolves, providing an important economic benefit to the state. I know that I will examine Montana's treatment of wildlife before considering another visit there, and right now, that treatment is substandard and cruel.

I urge the Commission to use its discretion to protect as many wolves as possible in implementing these cruel and barbaric new laws.

Montana Fish and Wildlife Commission

Dear Wildlife Commission,

I'm writing to express my opposition to sweeping new laws that create the potential to expand the slaughter of wolves in Montana through cruel and barbaric hunting practices and to urge the Commission to exercise its authority to protect wolves.

While some may call these new laws wolf "management," the intent is obvious: the decimation of wolf populations across Montana.

I urge the Commission to use its discretion to protect as many wolves as possible in implementing new laws. This includes:

- 1) Forgoing the expansion of the wolf hunting and trapping season;
- 2) Banning the use of snares on public lands;
- 3) Prohibiting the use of baits for hunting and trapping and prohibiting night hunting across the state; and
- 4) Limiting the hunting of wolves to one wolf per license, with the lowest bag limit allowed per law applied across the state.

Wolves are an important native wildlife species in Montana and wolves are an important part of healthy ecosystems. Wildlife lovers from around the world come to Montana for the chance to see wolves, providing an important economic benefit to the state.

I urge the Commission to use its discretion to protect as many wolves as possible in implementing these cruel and barbaric new laws.

Sincerely,

Debra Arrington

Montana Fish and Wildlife Commission

Dear Wildlife Commission,

State legislatures in Montana and Idaho passed--and Governors Little (R-ID) and Gianforte (R-MT) signed into law a sweeping and widely opposed series of laws that could kill as many as 90 percent of the states' wolves.

Idaho's newly-enacted law authorizes year-round wolf trapping on private lands, including during the season when nursing pups and females are most vulnerable. It permits the killing of wolves by night hunting with night-vision equipment, aerial gunning, as well as hunting from snowmobiles, all-terrain vehicles and other brutal methods. It also allows an individual to purchase unlimited wolf tags and to use those tags for hunting, trapping, and snaring in any unit where the season is open.

In Montana, multiple anti-wolf laws passed this year will allow trappers to use cruel and indiscriminate neck snares to kill multiple wolves during the state's trapping season and even created a bounty to pay those killing wolves in the state.

This is the emergency that the authors of the Endangered Species Act envisioned when they included language making emergency relisting possible.

Since losing Endangered Species Act protections a decade ago, thousands of wolves have been killed by hunters and trappers in the states of Idaho and Montana.

The Trump Administration's broad, unscientific delisting of gray wolves from the Endangered Species Act was a last-minute outrage demonstrating his personal disdain for our natural world, wildlife, and wilderness.

Gray wolves in this country have only begun to recover, occupying just 10 percent of their historic range and less than 30 percent of their remaining suitable habitat. The job of recovering them is simply incomplete.

The successful recovery of gray wolves in the Northern Rockies was only possible because of the strong protections of the Endangered Species Act. The Trump Administration's delisting rule jeopardizes any future--and existing--recovery by allowing states to manage gray wolves as game species.

This has already led to violent death for many wolves. In a hastily-organized and unscientific wolf hunting and trapping season in Wisconsin this February, more than 200 gray wolves were slaughtered in less than one week--82 percent more wolves were killed than allowed by the hunting quota.

The unsustainable management of gray wolves by the states clearly demonstrates that gray wolves must retain Endangered Species Act protections until they have fully recovered.

.I'm writing to express my opposition to sweeping new laws that create the potential to expand the slaughter of wolves in Montana through cruel and barbaric hunting practices and to urge the Commission to exercise its authority to protect wolves.

While some may call these new laws wolf "management," the intent is obvious: the decimation of wolf populations across Montana.

I urge the Commission to use its discretion to protect as many wolves as possible in implementing new laws. This includes:

- 1) Forgoing the expansion of the wolf hunting and trapping season;

Subject: [EXTERNAL] I Oppose the Wolf Hunting and Trapping Proposals
Date: Monday, August 2, 2021 7:40:28 AM

Dear Montana Fish & Wildlife Commission,

Montana already has aggressive hunting and trapping seasons for wolves — and its wolf population is already decreasing. The state doesn't need to expand the seasons or approve new tools for killing wolves.

For example, I oppose rules allowing baiting wolves and killing wolves at night because they violate fair-chase ethics and increase the risk of killing other wildlife and even family dogs.

I also oppose increasing the bag limit for wolves — a single hunter shouldn't be able to wipe out an entire pack of wolves. And hunters should be required to obtain one license for each wolf killed.

I don't support any form of snaring, and I ask you to ban snaring on public lands and limit snaring elsewhere as much as possible.

These common-sense measures will help save the lives of grizzly bears, Canada lynx and other wildlife, as well as companion animals.

Thank you for considering my comment.

Montana Fish and Wildlife Commission

Dear Wildlife Commission,

I'm writing to express my opposition to sweeping new laws that create the potential to expand the slaughter of wolves in Montana through cruel and barbaric hunting practices and to urge the Commission to exercise its authority to protect wolves.

While some may call these new laws wolf "management," the intent is obvious: the decimation of wolf populations across Montana.

I urge the Commission to use its discretion to protect as many wolves as possible in implementing new laws. This includes:

- 1) Forgoing the expansion of the wolf hunting and trapping season;
- 2) Banning the use of snares on public lands;
- 3) Prohibiting the use of baits for hunting and trapping and prohibiting night hunting across the state; and
- 4) Limiting the hunting of wolves to one wolf per license, with the lowest bag limit allowed per law applied across the state.

Wolves are an important native wildlife species in Montana and wolves are an important part of healthy ecosystems. Wildlife lovers from around the world come to Montana for the chance to see wolves, providing an important economic benefit to the state.

I urge the Commission to use its discretion to protect as many wolves as possible in implementing these cruel and barbaric new laws.

Sincerely,

Donna Campbell

Montana Fish and Wildlife Commission

Dear Wildlife Commission,

I'm writing to express my opposition to sweeping new laws that create the potential to expand the slaughter of wolves in Montana through cruel and barbaric hunting practices and to urge the Commission to exercise its authority to protect wolves.

While some may call these new laws wolf "management," the intent is obvious: the decimation of wolf populations across Montana.

I urge the Commission to use its discretion to protect as many wolves as possible in implementing new laws. This includes:

- 1) Forgoing the expansion of the wolf hunting and trapping season;
- 2) Banning the use of snares on public lands;
- 3) Prohibiting the use of baits for hunting and trapping and prohibiting night hunting across the state; and
- 4) Limiting the hunting of wolves to one wolf per license, with the lowest bag limit allowed per law applied across the state.

Wolves are an important native wildlife species in Montana and wolves are an important part of healthy ecosystems. Wildlife lovers from around the world come to Montana for the chance to see wolves, providing an important economic benefit to the state.

I urge the Commission to use its discretion to protect as many wolves as possible in implementing these cruel and barbaric new laws.

Sincerely,

There needs to be more eviction (Death) of the wolves. Enough is enough get them under control ASAP. They have wiped out our elk. What happen to common sense. Lolo zone, had 8000 elk now less than 800.

Now we are getting a grizzly problem !

Sportsman's pay your wage not the environmentalist. They cost you money
