Region 3

HD 300 name change to HD 303

Reason for Change/Description of the Change: No change to district boundaries or species harvest structure is proposed. This would only assign a new hunt district number to this district. Renaming D/E HD 300 to HD 303 is expected to improve the reliability of hunter survey data. Currently an unknown proportion of hunters appear to use HD 300 to refer to Region 3 in general. This inflates deer and elk hunter and harvest statistics by an unknown amount.

Boundary description of new HD 303 is the same as the description of what was previously HD 300.

That portion of Beaverhead County lying within the following-described boundary: Beginning at the junction of Interstate 15 and the Big Sheep Creek Road south of Dell, then southwesterly along said road to Meadow Creek, then westerly along said creek to the Montana-Idaho border, then southeasterly along said border to Italian Peak, then northeasterly along said border to Interstate 15 at Monida, then northerly along said interstate to the junction with the Big Sheep Road south of Dell, the point of beginning.

HD 301 Hyalite Portal—Hyalite Portal-Spanish Peaks

HD 304 (new)

Reason for change/Description of the Change: Regulation simplification and removal of portions. New HD 304 will be the south portion of old HD 311 + a portion of old HD 360. The portion of HD 360 was added for boundary simplicity and for biological reasons to encompass the elk herd which resides at the south end of the Spanish Peaks.

Those portions of Madison and Gallatin Counties lying within the following-described boundary: Beginning at the intersection of US Highway 287 and Route 84 at Norris, then easterly along said highway to Shedd's Bridge, then south along the Gallatin River to the mouth of the West Fork of the Gallatin River at Big Sky, then west along the West Fork of the Gallatin River to its first intersection with Highway 64, then west and north along Highway 64 to the Gallatin-Madison Watershed divide, then along the Madison-Gallatin divide to Red Knob Mountain, then westerly down Trail Creek to its intersection with Ennis Lake Road in Beartrap Canyon, then southerly along said road to its intersection with the North Ennis Lake Road then west along said county road to its intersection with US Highway 287 at McAllister, then northerly along said highway to its intersection with Route 84 at Norris, the point of beginning.

HD 310

Reason for Change/Description of the Change: HD 310 has a wintering elk population that is chronically below objective. HD 310 has a restrictive regulation (bulls only) whereas neighboring districts allow more liberal harvest (bulls and antlerless). Recent GPS collar data from research work shows where the HD 310 elk herd used areas outside the old HD 310 boundaries. This boundary change will better encompass the areas used by the HD 310 elk herd, will protect the reproductive segment of this herd under the restrictive season type of HD 310, and should therefore encourage population growth of this below-objective herd.

Combine HD 360 and HD 362 (except for a portion of HD 360 that is proposed to be combined with HD 310 and a portion of HD 360 that is proposed to be combined with proposed HD 301.)

NOTE: The Gallatin Special Management Area (Bacon Rind and Buffalo Horn Units) are closed to all deer and elk hunting except Elk hunting by special permit only.

NOTE: The Gallatin Special Management Area (Bacon Rind and Buffalo Horn Units) are closed to all deer and elk hunting except Elk hunting by special permit only.

HD 311

Reason for Change/Description of the Change: Regulations simplification. Combine the north portion HD 311 and the northeast portion of HD 333. New HD name will be HD 311. The south portion of old HD 311 ~~is proposed to be combined with HD 301 (see HD 301 proposal.)~~will become new HD 304.

HD 329 & 328

Reason for Change/Description of the Change: Regulation simplification. Combine HD 329 and the western portion of HD 328 New HD name, HD 329. This is proposed to simplify regulations and not for biological reasons. However, GPS data from cow elk collared in Montana and Idaho show that elk freely move between HD 329 and the west half of HD 328. This is further supported by ground and aerial observations that show seasonal movement between these two areas. This change, coupled with the expansion of HD 302, will eliminate HD 328.

HD 343 & 293

Reason for Change/Description of the Change: Boundary: Regulations simplification. Combine HD 343 with the eastern portion of HD 293. New HD name will be HD 343. Because we're recommending retention of HD 339, which in the 2005 Elk Plan includes an objective for a minimum average age of 5.5 years for bull elk harvested with a limited Either sex Elk Permit, and HD 388 for safety reasons, we recommend retention of HD 343 combined with the eastern portion of HD 293. HD 445

Reason for Change/Description of the Change: The proposed change is to switch the boundary between HD 421 and HD 445 from the Missouri River to Interstate-15. Presently, the boundary between the two districts is the Missouri River from Holter Lake to the town of Cascade, then Interstate-15 from Cascade to Ulm. To simplify the regulations we propose to switch this boundary so that it is Interstate-15 from Rock Creek below Holter Dam to Ulm; one geographic feature the entire length of the hunting district boundary. This proposed change also allows FWP to clarify the HD boundary as it passes through the town of Ulm, i.e. along Millegan Road to the Ulm Bridge over the Missouri River. ~~This change reflects two separate and unique proposed boundary changes affecting HD's 445, 455, 421 and 423. The first is to change the boundary between HD 445 and 423 from the Missouri River to Interstate 15. The second is to incorporate the Whitetail Prairie Addition of the Beartooth Wildlife Management Area into HD 455, which also includes portions of the Beartooth Wildlife Management Area. The new regulations database is unable to keep the two changes separate as is required to keep comment on the two changes separate for regulations simplification purposes. Commission ruling on the proposed changes will ultimately dictate what the final legal description for HD 445 will be. If both proposed changes are accepted, the HD 445 legal description could be written as is below. If only one proposed change is accepted, the legal description would look different depending on which is accepted and which proposed change is rejected. Both proposed changes individually simplify the hunting district boundaries in efforts to simplify the regulations.~~
