Q2

Please comment on Bighorn Sheep Amendment

Strongly agree with the amendment, but there are also other issues with the unlimited units that need to be addressed.
-Three and four year old rams shouldn't be legal. It should be 8+ yr old or broomed rams only.
-The number, or percentage, of nonresident hunters needs to be capped.

Q2

Please comment on Bighorn Sheep Amendment

I support this amendment. Seeing that in recent years many units have gone over quota, it concerns me. On one side it is very good because the shows that most herds are likely increasing. I judge this statement by seeing that the location of rams and number of rams harvested. I see that they are not concentrated to one location in a unit. But I would rather see a shorter reporting time frame to manage these units. Which in time if the herds continue to grow this would allow the F&G to raise quotas up to levels needed to properly manage the herd.

Q2

Please comment on Bighorn Sheep Amendment

I am in full support of tighter reporting mandates for the unlimited sheep units in Montana. We need to preserve these hunts and do what we can to prevent over harvest in these areas. There are virtually no hunters dedicated to these hunts that don't have the capabilities to reach out within hours of a harvest. Let's tighten up the reporting and closing times.

Q2

Please comment on Bighorn Sheep Amendment

Although I've never taken advantage of the opportunity to hunt an unlimited sheep area, I've applied for a sheep permit for over 20 years. That being said I may want the opportunity in the future before Father Time takes its final toll on me. I believe if over harvest is an issue that would be the fault of the game department not the hunters. With the inreach technology there's no reason why the department couldn't shut the season down in a very timely manner. Please keep this opportunity available for hunters but get with the technology to assure over harvest isn't an issue. Thank you
Jason Clinkenbeard

Please comment on Bighorn Sheep Amendment

I agree with the amendment....

It has to happen...we can't be killing over the quota in every unlimited unit. It's not sustainable. It is an amazing opportunity for hunters to go sheep hunting...

We need to preserve it....!!

Q2

Please comment on Bighorn Sheep Amendment

I am in full support of this amendment. This Unlimited reporting change is a necessity to maintain the hunt in all 5 districts. The increased interest in the hunt shown by increased tag sales and hunter participation has put more pressure on the quotas. 4 of the 5 districts went over harvest this year (2024.) There were also multiple districts that went over harvest last year, with 502 being over quota by 100%. 4 of the last 5 years we have had districts go over harvest. Many of these rams were taken outside of the proposed closure time (24 hour report, 24 hour closure,) showing that multiple rams that were over quota would NOT have been harvested if this amendment had been in place. The harvest data shows this WILL have a positive impact on the populations.

With current technology (InReach etc) and increased cell coverage in these units, there is absolutely no reason a hunter cannot report harvest within 24 hours and check the quota status every day if the closure is moved to 24 hours. These sheep populations are a very limited resource with only quota of only 2 rams per unit. These 5 Unlimited units are the only over the counter sheep hunting opportunity in North America. This amendment will help protect all 5 districts populations to stay within harvest quota numbers, it is a necessity we implement this new shorter closure time frame to protect these hunts for future opportunities.

Q2

Please comment on Bighorn Sheep Amendment

Given the new technology available for communication and the amount of extra participation in these unlimited bighorn sheep hunts I fully support the change proposed on the reporting timing and presentation of the ram harvested. These quota hunts have gone over harvest multiple times the past few years and we need to implement a change to avoid this issue so that the opportunity is sustainable for future participation.

Thank you

Q2

Please comment on Bighorn Sheep Amendment

I support this amendment. Several units have gone over quota in the last few years, with many of the rams killed during the pending closure time being young, borderline legal, and sometimes sub-legal, rams. This could increase the number of surviving younger rams, which were never intended for harvest under legal ram provisions, in order to increase the age structure and health of the sheep herds while enhancing the experience for all hunters in the unlimited units.

Q2

Please comment on Bighorn Sheep Amendment

I strongly support this amendment and believe it is essential to preserve the unique opportunity most hunters will ever have to pursue bighorn sheep.

The proposed amendment would shorten reporting and closure times, which is crucial to preventing overharvesting. This year, four out of the five districts exceeded their harvest quotas, and biologists have already expressed concerns that this could jeopardize future quotas. Implementing these changes is vital to protecting the sustainability of these hunts and ensuring they remain accessible for future generations of hunters.

Q2

Please comment on Bighorn Sheep Amendment

We are in full support of this proposed amendment. Monte is a founding member of Montana Wild Sheep Foundation and Montana Outfitters and Guides Association. Outfitted for bighorn sheep hunters in district 300 beginning in 1974 until 2007. Back in the early days, it was a scramble for FWP to get out in the field immediately to post closure notices at various trailheads. It was an inconvenience for the hunter to travel out to a trail head every 24 hours to see if there was a notice posted. Cell phones and satellite phones were a wonderful change. It was still a real scramble to get a harvested ram checked in in person within 48 hours. As long as the harvested ram can be reported via telephone immediately, a 72 hour check-in period is reasonable. It gives time to pack out camp. The hunter can present the animal to FWP during regular working hours. We strongly support 24 hour harvest reporting requirement, 24 hour closure notice, and 72 hours to present the harvested ram to FWP for all unlimited sheep districts.

Q2

Please comment on Bighorn Sheep Amendment

I support this Amendment. I have been hunting in the Unlimited Sheep areas for 35 years. With increased pressure in recent years, I believe these changes would definitely help alleviate going over the harvest quotas. The extended presentation time allotment from 48 to 72 hours would allow for better meat care in the backcountry. Meat could be properly cooled over night instead of the immediate blackouts that have often been necessary in the past.

Q2

Please comment on Bighorn Sheep Amendment

As a passionate sheep hunter and advocate from Alaska, I support the Bighorn Sheep Amendment on both changes.

In light of increased pressure to harvest a ram, the reduced grace period of the unit closure after the second ram has been taken, is a step that I feel necessary to limit harvest of excess rams. The future of this unique opportunity to hunt Bighorn sheep on an OTC tag cannot be taken for granted and should be protected in order to continue providing opportunity for those that value what the Unlimited hunts offer.

The second point of increasing the inspection time from 48 to 72 hours would also be a welcome change in order to allow the successful hunter to make decisions that prioritize meat care and safety.

I was able to take a ram in 500 last November on a solo hunt. The 48 hour inspection rule required leaving meat on the mountain unattended in order to get the trophy value of the animal out first, which goes against both my own preference as well as Alaska regulations. The change would also reduce the risk of injury for those that are either solo or deep in the mountains.

I do not support this amendment. If there is sufficient evidence supporting that there are sheep being harvested during this time then there's no reason to change it. While with the changes in communication it is easier this technology is not required to be carried while recreating. Limiting opportunity because we assume that all individuals have access to these resources is a wrong way to approach the argument. Until the modern forms of communication are required to carry in the field it should not be supported.

Please comment on Bighorn Sheep Amendment

As a dedicated hunter of the unlimited areas, with over 80 hunt days since 2018, I support the proposed changes to shorten the harvest reporting and season closure timeframes. This change will help address the recent and ongoing issue of units killing sheep over the quota, as many of these rams are killed when the unit is pending closure. This is particularly an issue in unit 502, where it has become common for successful hunters to get their sheep out then grab a friend to go back in to harvest the other rams they found during the closure window. This change is needed to help the unlimited areas to remain viable from biological and social perspectives. Thank you.

Please comment on Bighorn Sheep Amendment

Commissioners, I would like to express my support for this amendment. It is a very unique opportunity that we have this over the counter unlimited opportunity to hunt sheep in Montana. This unique opportunity has attracted a lot of attention in recent year which had led to overharvest in some instances. In order preserve this opportunity into the future I am in favor of a reduction in time for harvest reporting to limit the potential for overharvest. Our biologists are skilled at setting sustainable harvest quotas, but if the timeline for reporting allows for an increased potential for overharvest it should be changed. Thank you for the opportunity to comment.

Q2

Please comment on Bighorn Sheep Amendment

I support Vice Chair Tabor's Amendment. However, these new rules need to be coupled with increased opportunities for unlimited bighorn sheep hunting. I hunted the Hilgards in the years prior to the sheep die-off. At the time that the unit was closed, FWP repeatedly stated that the Hilgards unit would be returned to unlimited status once the population was recovered. Why has FWP lied about this? In addition to the Hilgards, the West Boulder should have an unlimited season. Also, the Monument Peak area should be managed as a subunit of District 500 because many years the quota is filled with young rams being killed near Monument Peak and there being no opportunity for hunting the other population of sheep in District 500. This was the case in 2024. Lastly, FWP has not been severe enough in punishing hunters who kill sub-legal rams in the unlimited units. These hunters need to be banned from sheep hunting because they are stealing opportunity from ethical hunters. Make an example so this problem is stopped.

Q2

Please comment on Bighorn Sheep Amendment

On behalf of the Montana Outfitters and Guides Association (MOGA), we express our support for the proposed amendment to the 2025-2026 Bighorn Sheep Regulations. This adjustment to reduce reporting and season closure times from 48 to 24 hours reflects the practical realities of modern technology and promotes more efficient management of unlimited bighorn sheep units.

The shorter reporting timeline and season closure window will help prevent over-harvesting by reducing the time the season remains open after the quota is met. With advancements in communication technology, including the widespread availability of text-based reporting, hunters now have the tools needed to meet these updated requirements without undue burden.

Additionally, the proposed increase in head and cape inspection time to 72 hours provides an appropriate buffer for hunters navigating backcountry conditions. This balance supports effective wildlife management while respecting the challenges hunters face in remote areas.

MOGA recognizes the importance of sustainable management practices and applauds the Commission's efforts to align regulations with modern capabilities. We encourage adoption of this proposal to maintain robust wildlife populations and ensure fair access to hunting opportunities.

Will Israel
Executive Director
Montana Outfitters & Guides Association

The shorter reporting timeline and season closure window will help prevent over-harvesting by reducing the time the season remains open after the quota is met. With advancements in communication technology, including the widespread availability of text-based reporting, hunters now have the tools needed to meet these updated requirements without undue burden.

Additionally, the proposed increase in head and cape inspection time to 72 hours provides an appropriate buffer for hunters navigating backcountry conditions. This balance supports effective wildlife management while respecting the challenges hunters face in remote areas.

MOGA recognizes the importance of sustainable management practices and applauds the Commission's efforts to align regulations with modern capabilities. We encourage adoption of this proposal to maintain robust wildlife populations and ensure fair access to hunting opportunities.

Please comment on Bighorn Sheep Amendment

With the mention of 24 hour harvest reports due to modern technology will there be an option to report harvesting via satellite (inreach) text message?
