Elk Hunting Access Agreement Proposal Master List

Application Number	Hunting District	Applicant Name	Total Private Acres Enrolled-including leased private acres	Maximum Days Per Hunter	Days Advance Notice for Public Hunters	Seasons Public Hunters Allowed Access	Process to Select LO Selected Public Hunters	Sex of Elk Hunted by LO Selected Public Hunters	Sex of Elk Hunted by FWP Selected Public Hunters	Landowner (LO) Requested LPT-Valid ONLY on LO Private Land or Private Leased by LO	Total Number of Landowner License LPT Requested	Regional Notification? (Y/N)	Negative Impact to Elk Resource? (Y/N)	Department Determined Ability to Accommodate Successful Public Hunting in General Season? (Y/N)	Additional Public Hunting Opportunity? (Y/N)	Notes/Regional Feedback:	Landowner/ Designated License Recipient Residency	Program Recommendation to Approve? (Y/N)
1	103	SPP	14,482	7	3	General Rifle	LO selects public hunters no later than 3-weeks prior to agreement start	antlerless only elk	antlerless elk only	1-103-00 elk B license	1	Y	N	Y	unknown at time of application	The proposed agreement is a popular hunting destination among the general public. The area is part of the larger Lost Trail & Island Lake Complex, an area that has traditionally accounted for a significant proportion of elk harvest in HD 103. This proposal will have some enforcement challenges as this area has historically been open with no sign in via the Block Management Program.	1-R	Y
2	121	Naegeli Ranch	970	N/A	N/A	Archery; General Rifle; Muzzleloader; Late Elk Shoulder	N/A	N/A	either-sex elk	1-121-01 shoulder season only antlerless elk	1	Y	N	Y	Y	Hunters are to follow the BMA rules. This property has historic late shoulder season elk harvest, and the landowner will continue providing access to hunters beyond the minimum of the EHA.	1-R	Y
3	201	Clark Fork Cattle Co.	620	N/A	2	General Rifle	LO selects public hunters no later than 3-weeks prior to agreement start	antlerless only elk	1 either-sex elk and 1 antlerless only elk	1- general elk license	1	Y	N	Y	unknown at time of application	Elk often remain on this property for long periods of time during the year. This would allow access to normally inaccessible elk and good option for disabled hunters due to road networks.	1-NR	Y
4	380	Dunn Canyon Cattle Co.	6,066	N/A	N/A	Archery; General Rifle; Muzzleloader	N/A	N/A	all either-sex elk	2- 380-20 (either-sex) elk	2	Y	N	Y	Y	The property is typically included in an early season elk management hunt that is done annually in HD 380 to address elk distribution/game damage issues when elk hit irrigated alfalfa pivots/hayfields along the Boulder River in late summer. Elk are found on and off again on the property and on the adjacent BLM land during the archery and general rifle season, so there is opportunity to provide successful hunting opportunity. Property gets quite a bit of hunting pressure (due to being in Block Mgmt. which likely lowers the chance of finding elk on the property as the hunting season progresses. Dunn Canyon had an EHA in 2022 and 2023. The two additional 380-20 (if authorized) permits in and of themselves would have minimal biological consequences. It's more of a cumulative impacts concern depending how many EHA bull permits are issued in the HD total and how many of the recipients end up being successful.	2-R	Y
5	380	Hahn Ranch	2,136	N/A	2 (for non BMA enrolled lands)	General Rifle	LO selects public hunters no later than 3-weeks prior to agreement start	antlerless only elk	antlerless only elk	2- 380-00 (antlerless only elk licenses)	2	Y	N	Y	Y	Most of the hunting opportunity is going to be on the portion of the property that is under the FWP CE/Block Mgmt. Elk may potentially be found on that property on and off again during both the archery and rifle season.	2-R	Y

Elk Hunting Access Agreement Proposal Master List

Application Number	Hunting District	Applicant Name	Total Private Acres Enrolled-including leased private acres	Maximum Days Per Hunter	Days Advance Notice for Public Hunters	Seasons Public Hunters Allowed Access	Process to Select LO Selected Public Hunters	Sex of Elk Hunted by LO Selected Public Hunters	Sex of Elk Hunted by FWP Selected Public Hunters	Landowner (LO) Requested LPT-Valid ONLY on LO Private Land or Private Leased by LO	Total Number of Landowner License LPT Requested	Regional Notification? (Y/N)	Negative Impact to Elk Resource? (Y/N)	Department Determined Ability to Accommodate Successful Public Hunting in General Season? (Y/N)	Additional Public Hunting Opportunity? (Y/N)	Notes/Regional Feedback:	Landowner/ Designated License Recipient Residency	Program Recommendation to Approve? (Y/N)
6	380	Radley Ranch-O'Connell	649	7	1	Archery; General Rifle	LO selects public hunters no later than 3-weeks prior to agreement start	antlerless only elk	either-sex elk	1-380-20 either sex	1	Y	N	Y	Y	Radley's had an EHA in 2022 and 2023. Prior to their EHA agreements, the Radley Ranch was not open to any public hunting access in the past. The property had only been hunted by family and possibly a few friends in the past. The property typically has elk on the property off and on throughout the archery and rifle season, so there should be at least some opportunity available. HD 380 generally has great public access for hunting, so the additional hunting access the EHA will provide to the public (very limited number of hunters) will be minimal. Although, given the size of the property, any additional hunting pressure will help keep the property from becoming a refuge area during the hunting season. The one additional 380-20 (if authorized) permit in and of itself would have minimal biological consequences. It's more of a cumulative impacts concern depending how many EHA bull permits are issued in the HD.	1-R	Y
7	380	Zipperian Family LLC	1,645	7	7	Archery; General Rifle	LO selects public hunters no later than 3-weeks prior to agreement start	either-sex elk	1 either-sex elk and 1 antlerless only elk	1-380-20 either sex permit	1	Y	N	Y	Y	Other than friends and family, public hunting access has generally been limited to youth and disabled hunters in the recent past. Landowner stated hunters that he lets in generally have fared well in harvesting elk. It is one of the largest, if not the largest, intact properties in that area of HD 380. It will generally have elk on it a least off and on again during the archery and general rifle season. The property should be able to provide good hunting opportunity. Without hunting pressure during the hunting season, the property does have the potential to become a refuge area.	1-R	Y
8	410	Lencioni	1,073	N/A	7	Archery; General Rifle; Muzzleloader	LO selects public hunters no later than 3-weeks prior to agreement start	either-sex elk	1 either-sex elk and 1 antlerless only elk	1-410-20 either-sex elk permit	1	Y	N	Y	Y	This EHA has potential to provide a successful public hunting opportunity, but a smaller property. Landowner very likely to have success but unsure about public hunters depending on when they can hunt.	1-R	Y
9	410	Oke	1,242	5-Mar	7	Archery; General Rifle	LO selects public hunters no later than 3-weeks prior to agreement start	either-sex elk	2 either sex and 2 antlerless only	2-410-21- either-sex elk archery only	2	Y	N	Y	unknown at time of application	This EHA has potential to provide a successful public hunting opportunity, but a smaller property.	2-R	Y
10	410	William Thompson	780	7	10	Archery; General Rifle	LO selects public hunters no later than 3-weeks prior to agreement start	either-sex elk	1 either-sex elk and 1 antlerless only elk	1-410-21 either sex archery only	1	Y	N	Y	unknown at time of application	This EHA has potential to provide a successful public hunting opportunity, but a smaller property.	1-R	Y

Application Number	Hunting District	Applicant Name	Total Private Acres Enrolled-including leased private acres	Maximum Days Per Hunter	Days Advance Notice for Public Hunters	Seasons Public Hunters Allowed Access	Process to Select LO Selected Public Hunters	Sex of Elk Hunted by LO Selected Public Hunters	Sex of Elk Hunted by FWP Selected Public Hunters	Landowner (LO) Requested LPT-Valid ONLY on LO Private Land or Private Leased by LO	Total Number of Landowner License LPT Requested	Regional Notification? (Y/N)	Negative Impact to Elk Resource? (Y/N)	Department Determined Ability to Accommodate Successful Public Hunting in General Season? (Y/N)	Additional Public Hunting Opportunity? (Y/N)	Notes/Regional Feedback:	Landowner/ Designated License Recipient Residency	Program Recommendation to Approve? (Y/N)
44	700	Browning- Travis	1,500	N/A	N/A	Archery; General Rifle; Late Elk Shoulder Season	LO selects public hunters no later than 3-weeks prior to agreement start	5- either sex elk and 5 antlerless only elk	20 either-sex elk	10-700-00 elk B licenses	10	Y	Y	Y	Y	Landowner originally requested 10 either-sex permits. However, there are concerns regarding allowing additional either-sex permits in the 700 HD. When landowner was notified that the department recommendation would be "no" due to biological concerns of harvesting additional bulls, landowner agreed to switch to elk B licenses. This changed program recommendation to "yes". HD700 has a below objective bull:cow ratio and harvesting additional bulls would further contribute to the decline. Considering the decrease in total bull numbers, a consistently below objective bull ratio, high harvest success rates on the 700-20 permit, and the close proximity these private lands are to each other, biologists are concerned with an increase in the number of either-sex elk permits in one area.	6-R; 4-NR	Y
45	702	P&L Cattle Co	13,000	2	5	General Rifle; Muzzleloader	LO selects public hunters no later than 3-weeks prior to agreement start	either-sex elk	1 either-sex elk and 1 antlerless only elk	1-799-20 either sex	1	Y	N	Y	Y	Landowners are excellent stewards of the land and have shared their property with the public through their participation in the Block Management Program since 1996. The landowner has requested that the public elk hunters be selected through standard methods of obtaining permission through the Block Management Program. Original application had 1 day. Staff requested and received confirmation the landowner will allow 2 days for EHA hunters in addition to Block Management hunters.	1-R	Y
46	702	Wapiti Mountain Ranch	13,859	7	2	General Rifle; Late Elk Shoulder Season	LO selects one public hunter from the 799-00 successful list	antlerless only elk	1 either-sex elk and 1 antlerless only elk	1-799-20 either sex permit	1	Y	N	Y	unknown at time of application	This will likely allow for successful public hunting access in the area is very limited especially for bull elk. LO proposal included in application does not meet program requirements. LO agreed to allow one either sex and one antlerless for FWP selections and one antlerless for the LO selection.	1-NR	Y
