

Montana 2021 Elk Counts

Elk are counted in winter or spring by aircraft. It is not possible to count all elk in a management unit and elk plan objectives are based on "Observed Elk", which may be elk observed on trend areas in some cases. Counting elk is an inexact exercise subject to a multitude of weather and timing variables and elk movements between hunting districts. Therefore, counts in some years may not accurately reflect elk numbers and better counts from previous years are reported.

Hunting District(s)	Elk Management Unit (EMU)	Elk Plan Objective	Objective Range	Most Recent Elk Count	Year of Count	Status - Over, At or Below Objective
100	PURCELL	300	240-360	138	2009	Below
101	SALISH	Surveys not flown due to urban low altitude flying constraints				
102	SALISH	Surveys discontinued due to difficulty observing elk in forested cover				
103	SALISH	260	208-312	230	2017	At
104	LOWER CLARK FORK	Surveys discontinued due to difficulty observing elk in forested cover				
109, 110	WHITEFISH	Surveys discontinued due to difficulty observing elk in forested cover				
120	SALISH	Surveys discontinued due to difficulty observing elk in forested cover				
121	LOWER CLARK FORK	1,355	1,084-1,626	1,418	2019	At

¹Only includes objectives for EMUs where elk are countable

²New boundary of HD 213 subsumes most winter range previously in HD 212

³Counts in these HDs may not be directly comparable to previous years' due to survey boundary changes informed by radio-telemetry studies
