

Human Waste Packout Requirement Narrative

Beginning in the 2024 float season, all private and commercial float parties will be required to pack out their human waste from the Smith River corridor. There are multiple types of agency approved, portable, hard-sided toilets acceptable for human waste disposal and are included on the attached document. Alternative waste disposal systems, including bag systems (i.e., Clean Waste, RESTOP2 etc.), are not allowed. **An RV dump station is located adjacent to the SCAT Machine building and is designated as an emergency backup only, in case one or both SCAT Machines are not functioning. THIS FACILITY IS NOT FOR PRIMARY PORTABLE TOILET CLEANING OR FOR OFF-SITE, NON-RIVER USERS.**

A SCAT (Sanitizing Containers with Alternative Technology) Machine providing for a user-friendly means of disposal has been installed at the Eden Bridge take-out. Agency approved portable, hard-sided toilets are designed to be washed and sanitized in the SCAT Machine after use. Alternative waste disposal systems, including bag systems (i.e., Clean Waste, RESTOP2 etc.), are not allowed.

Agency Approved Toilets	Manufacturer	SCAT Machine Compatible	RV Dump Compatible	Cost	Capacity	Additional Information	Instructions
20 MM Ammo Can	Various	YES	NO	Variable	50 uses	Various Army Surplus outlets and river equipment suppliers	20mm Ammo Can
